Start date: 10-01-2023

End date: 30-09-2027

Project abstract:

Dealing with classroom tensions created by sensitive topics such as refugee policy or climate change is a challenging activity for teachers. Although these topics have always existed, tensions increase with increased diversity in the classroom and increased critical consciousness and activism in society (i.e., wokeness). Increased discomfort and tension in the classroom have led teachers to avoid sensitive topics or to adopt other approaches they consider 'safe,' which may jeopardize the achievement of certain learning goals. Research into the nature of these tensions is needed in order to develop appropriate support. In this project, we will identify key domain-specific and domain-general determinants of tension when teaching sensitive or controversial topics. The framework we develop will provide an essential basis for further research and for supporting teachers in meeting the important challenge of dealing with sensitive issues in their teaching practice.

TEACHING SENSITIVE TOPICS: TOWARD A FRAMEWORK OF DOMAIN-SPECIFIC AND DOMAIN-GENERAL DETERMINANTS OF PEDAGOGIC FRAILTY

Research Data Summary

List and describe all datasets or research materials that you plan to generate/collect or reuse during your research project. For each dataset or data type (observational, experimental etc.), provide a short name & description (sufficient for yourself to know what data it is about), indicate whether the data are newly generated/collected or reused, digital or physical, also indicate the type of the data (the kind of content), its technical format (file extension), and an estimate of the upper limit of the volume of the data.

Dataset name / ID	Description	New or reuse	Digital or Physical data	Data Type	File format	Data volume	Physical volume
		Indicate: ***N****(ew data) or* ***E****(xisting data)*	Indicate: **D**(igital) or **P**(hysical)	Indicate: **A**udiovisual **I**mages **S**ound **N**umerical **T**extual **M**odel **SO**ftware Other (specify)		Indicate: <1GB <100GB <1TB <5TB >5TB NA	
CM-Interviews	Interviews	N	D	S	mp3	<1GB	
Survey	Survey	N	D	T	Xls	<1GB	
Video-recording	Video-recording	N	D	A	mp4	<1TB	
EDA	EDA	N	D	N	csv	<1GB	
VSR-Interviews	Interviews	N	D	S	mp3	<1GB	

If you reuse existing data, please specify the source, preferably by using a persistent identifier (e.g. DOI, Handle, URL etc.) per dataset or data type:

/

Are there any ethical issues concerning the creation and/or use of the data (e.g. experiments on humans or animals, dual use)? If so, refer to specific datasets or data types when appropriate and provide the relevant ethical approval number.

- Yes, human subject data (Provide SMEC or EC approval number below)

G-2023-7285

Will you process personal data? If so, please refer to specific datasets or data types when appropriate and provide the KU Leuven or UZ Leuven privacy register number (G or S number).

- Yes (Provide PRET G-number or EC S-number below)

G-2023-7285

Does your work have potential for commercial valorization (e.g. tech transfer, for example spin-offs, commercial exploitation, …)? If so, please comment per dataset or data type where appropriate.

- No

Do existing 3rd party agreements restrict exploitation or dissemination of the data you (re)use (e.g. Material or Data transfer agreements, Research collaboration agreements)? If so, please explain in the comment section to what data they relate and what restrictions are in place.

- No

Are there any other legal issues, such as intellectual property rights and ownership, to be managed related to the data you (re)use? If so, please explain in the comment section to what data they relate and which restrictions will be asserted.

- No

Documentation and Metadata

Clearly describe what approach will be followed to capture the accompanying information necessary to keep data understandable and usable, for yourself and others, now and in the future (e.g. in terms of documentation levels and types required, procedures used, Electronic Lab Notebooks, README.txt files, codebook.tsv etc. where this information is recorded).

The data is comprised of several raw-like data files, one or several excel files that contain participant background information and links to the data files and a README.txt that contains the explanation of the use of the excel file and data files.

Will a metadata standard be used to make it easier to find and reuse the data?
If so, please specify which metadata standard will be used.

If not, please specify which metadata will be created to make the data easier to find and reuse.

- No

Data Storage & Back-up during the Research Project

Where will the data be stored?

- OneDrive (KU Leuven)

How will the data be backed up?

- Standard back-up provided by KU Leuven ICTS for my storage solution

Is there currently sufficient storage & backup capacity during the project?

If no or insufficient storage or backup capacities are available, explain how this will be taken care of.

- Yes

How will you ensure that the data are securely stored and not accessed or modified by unauthorized persons?

Secured network drive from KU Leuven
OneDrive linked to a KU Leuven account

What are the expected costs for data storage and backup during the research project? How will these costs be covered?

No extra costs are expected.

Data Preservation after the end of the Research Project

Which data will be retained for 10 years (or longer, in agreement with other retention policies that are applicable) after the end of the project?

In case some data cannot be preserved, clearly state the reasons for this (e.g. legal or contractual restrictions, storage/budget issues, institutional policies...).

- All data will be preserved for 10 years according to KU Leuven RDM policy

Where will these data be archived (stored and curated for the long-term)?

- Shared network drive (J-drive)

What are the expected costs for data preservation during the expected retention period? How will these costs be covered?

No costs.

Data Sharing and Reuse

Will the data (or part of the data) be made available for reuse after/during the project?
Please explain per dataset or data type which data will be made available.

- No (closed access)

If access is restricted, please specify who will be able to access the data and under what conditions.

Researchers and supervisors in the project

Are there any factors that restrict or prevent the sharing of (some of) the data (e.g. as defined in an agreement with a 3rd party, legal restrictions)?

Please explain per dataset or data type where appropriate.

- Yes, privacy aspects

Where will the data be made available?

If already known, please provide a repository per dataset or data type.

- Other (specify below)

Does not apply

When will the data be made available?

- Other (specify below)

Does not apply

Which data usage licenses are you going to provide?

If none, please explain why.

- Other (specify below)

Custom KU Leuven

Do you intend to add a persistent identifier (PID) to your dataset(s), e.g. a DOI or accession number? If already available, please provide it here.

- No

What are the expected costs for data sharing? How will these costs be covered?

Does not apply

Responsibilities

Who will manage data documentation and metadata during the research project?

The pdh researchers and their supervisors.

Who will manage data storage and backup during the research project?

The pdh researchers and their supervisors.

Who will manage data preservation and sharing?

The pdh researchers and their supervisors.

Who will update and implement this DMP?

The supervisors
