

## FWO DMP Template - Flemish Standard Data Management Plan

Project supervisors (from application round 2018 onwards) and fellows (from application round 2020 onwards) will, upon being awarded their project or fellowship, be invited to develop their answers to the data management related questions into a DMP. The FWO expects a **completed DMP no later than 6 months after the official start date** of the project or fellowship. The DMP should not be submitted to FWO but to the research co-ordination office of the host institute; FWO may request the DMP in a random check.

At the end of the project, the **final version of the DMP** has to be added to the final report of the project; this should be submitted to FWO by the supervisor-spokesperson through FWO's e-portal. This DMP may of course have been updated since its first version. The DMP is an element in the final evaluation of the project by the relevant expert panel. Both the DMP submitted within the first 6 months after the start date and the final DMP may use this template.

The DMP template used by the Research Foundation Flanders (FWO) corresponds with the Flemish Standard Data Management Plan. This Flemish Standard DMP was developed by the Flemish Research Data Network (FRDN) Task Force DMP which comprises representatives of all Flemish funders and research institutions. This is a standardized DMP template based on the previous FWO template that contains the core requirements for data management planning. To increase understanding and facilitate completion of the DMP, a standardized **glossary** of definitions and abbreviations is available via the following [link](#).

Please provide a short project description	In this project the library of different Zr- and Hf- based metal-oxo clusters as a new generation of nanozymes for peptide bond hydrolysis will be synthesised and characterised. The nonenzymatic activity of synthesized cluster with tuneable surfaces properties, selectivity and activity will be examined toward wide range of proteins which differ in terms of structure, molecular weight, and isoelectric point. Furthermore, molecular insight into their interactions with proteins will be examined in order to establish their structure/activity relationship.

## 2. Research Data Summary

<sup>1</sup> "Project number" refers to the institutional project number. This question is optional since not every institution has an internal project number different from the GrantID. Applicants can only provide one project number.

<sup>2</sup> Funder(s) GrantID refers to the number of the DMP at the funder(s), here one can specify multiple GrantIDs if multiple funding sources were used.

### 3. Documentation and Metadata

Clearly describe what approach will be followed to capture the accompanying information necessary to keep <b>data understandable and usable</b> , for yourself and others, now and in the future (e.g. in terms of documentation levels and types required, procedures used, Electronic Lab Notebooks, README.txt files, Codebook.tsv etc. where this information is recorded).	<p>The experimental methodology, used protocols and planned experiments will be stored in personal lab books (hard copy) and in word documents stored in personal KU Leuven PC. All necessary information about the conducted experiments (date and number of experiments, detailed explanation of experiments (experimental conditions, characterisation of the experimental methods, outcome of obtained results, obtained yield)) will be documented deeply in details. For long-term storage an electronic copy will be stored on One Drive or one of KU Leuven online services.</p> <p>All experimental data collected from the various measurements will be stored in separate folder. #### 4. Data Storage & Back-up during the Research Project

<p>Where will the data be stored?</p>	<p>Original and processed data will be stored on the researcher's HDD, and copy will be saved on Microsoft OneDrive account provided by the host institute, in order to avoid the loss of the data and information. Shared data with other researchers who work on the same project will be saved on OneDrive, where all collaborators will have access at any time.</p>

<p><b>How will the data be backed up?</b></p> <p><i>WHAT STORAGE AND BACKUP PROCEDURES WILL BE IN PLACE TO PREVENT DATA LOSS? DESCRIBE THE LOCATIONS, STORAGE MEDIA AND PROCEDURES THAT WILL BE USED FOR STORING AND BACKING UP DIGITAL AND NON-DIGITAL DATA DURING RESEARCH.<sup>7</sup></i></p> <p><i>REFER TO INSTITUTION-SPECIFIC POLICIES REGARDING BACKUP PROCEDURES WHEN APPROPRIATE.</i></p>	<p>The data will be stored in two different locations:</p> <p>(a) The university's central servers/OneDrive</p> <p>(b) an external HDD provided by the hosting lab will be used</p>
<p><b>Is there currently sufficient storage &amp; backup capacity during the project? If yes, specify concisely. If no or insufficient storage or backup capacities are available, then explain how this will be taken care of.</b></p>	<p><input checked="" type="checkbox"/> Yes  <input type="checkbox"/> No</p> <p>If yes, please specify concisely:          2TB of OneDrive storage is available per researcher and provided by the hosting institution, which is free of charge. Archival storage is rented at the KU Leuven ICTS data center and can be expanded depending on the needs.          Also, the hosting lab will provide HDD for all members of the team          If no, please specify:</p>
<p><b>How will you ensure that the data are securely stored and not accessed or modified by unauthorized persons?</b></p> <p><i>CLEARLY DESCRIBE THE MEASURES (IN TERMS OF PHYSICAL SECURITY, NETWORK SECURITY, AND SECURITY OF COMPUTER SYSTEMS AND FILES) THAT WILL BE TAKEN TO ENSURE THAT STORED AND TRANSFERRED DATA ARE SAFE. <sup>7</sup></i></p>	<p>All KU Leuven services are personally authorized, so only the authorized personnel have access to it. All data will be protected by the personal researcher's password.          For all projects done in collaboration with the other groups, only limited access to certain data will be provided and shared which are of interest of both groups.</p>

What are the expected costs for data storage and backup during the research project? How will these costs be covered?	Microsoft OneDrive License is free of charge for all KU Leuven researchers. Archival data storage is centrally offered via KU Leuven on the University's servers. Additionally, the data can be saved at the HDD provided by the hosting lab.

#### 5. Data Preservation after the end of the Research Project

Which data will be retained for at least five years (or longer, in agreement with other retention policies that are applicable) after the end of the project? In case some data cannot be preserved, clearly state the reasons for this (e.g. legal or contractual restrictions, storage/budget issues, institutional policies...).	All collected and used data during FWO project will be stored at the Research Data Respiratory (RDR) of KU Leuven. Also, the copy of the data will be stored at the on an external HDD provided by hosting group and the lab notebook will be stored in the physical archive.
Where will these data be archived (stored and curated for the long-term)?	The data will be stored on the University's central servers (with automatic back-up procedures) for at least 10 years, conform the KU Leuven RDM policy. The HDD of the hosting lab will be used as well.
What are the expected costs for data preservation during the expected retention period? How will these costs be covered?	Data archival at KU Leuven is currently offered at 270 Euro/TB/year. 1TB of storage will be sufficient and the price for storage during 10 years is 2700 Euro. These costs are being covered by the budget of the research group.

## 6. Data Sharing and Reuse

<p>Will the data (or part of the data) be made available for reuse after/during the project? Please explain per dataset or data type which data will be made available.</p> <p><i>NOTE THAT 'AVAILABLE' DOES NOT NECESSARILY MEAN THAT THE DATA SET BECOMES OPENLY AVAILABLE, CONDITIONS FOR ACCESS AND USE MAY APPLY.
