

## FWO DMP Template - Flemish Standard Data Management Plan

Project supervisors (from application round 2018 onwards) and fellows (from application round 2020 onwards) will, upon being awarded their project or fellowship, be invited to develop their answers to the data management related questions into a DMP. The FWO expects a **completed DMP no later than 6 months after the official start date** of the project or fellowship. The DMP should not be submitted to FWO but to the research co-ordination office of the host institute; FWO may request the DMP in a random check.

At the end of the project, the **final version of the DMP** has to be added to the final report of the project; this should be submitted to FWO by the supervisor-spokesperson through FWO's e-portal. This DMP may of course have been updated since its first version. The DMP is an element in the final evaluation of the project by the relevant expert panel. Both the DMP submitted within the first 6 months after the start date and the final DMP may use this template.

The DMP template used by the Research Foundation Flanders (FWO) corresponds with the Flemish Standard Data Management Plan. This Flemish Standard DMP was developed by the Flemish Research Data Network (FRDN) Task Force DMP which comprises representatives of all Flemish funders and research institutions. This is a standardized DMP template based on the previous FWO template that contains the core requirements for data management planning. To increase understanding and facilitate completion of the DMP, a standardized **glossary** of definitions and abbreviations is available via the following [link](#).

Please provide a short project description	<p>Over the past 30 years, the discovery of previously unknown sermons has stressed the high value of these sources for the theology and history of early Christianity. Indeed, the sermons reflect a theology in action, seeking to shape the Christian identity of their audiences. Initially focused on the texts of known authors, research is now turning to the sermons of uncertain authorship. My project focuses on the Vienna collection: 60 late antique Latin sermons, falsely attributed to John Chrysostom, which were discovered in the 1990s. They are of great interest because, until recently, they were considered to be the work of a bishop of a 'dissident' African Christian group, the so-called 'Donatists'. To shed new light on this increasingly contested hypothesis and to unlock the exegesis and theology of the Vienna sermons, I propose a comprehensive study with a set of methodologies that have not yet been applied to this collection: a critical edition, and a comprehensive analysis of the content, taking into account the literary genre of these texts (with rhetoric and stylometric tools), and situating their exegetical and theological content within the patristic tradition (with a historical-critical and comparative method). Among other unexplored aspects, I will investigate the cult of martyrs, the Trinitarian theology (with Subordinatist overtones), and the theology of justification and grace (surprisingly close to another 'dissident' Christian current, 'Pelagianism').</p>

How will you ensure that the data are securely stored and not accessed or modified by unauthorized persons?  <i>CLEARLY DESCRIBE THE MEASURES (IN TERMS OF PHYSICAL SECURITY, NETWORK SECURITY, AND SECURITY OF COMPUTER SYSTEMS AND FILES) THAT WILL BE TAKEN TO ENSURE THAT STORED AND TRANSFERRED DATA ARE SAFE. <sup>7</sup></i>	The computer and the drive access are password protected. The external hard disk will be kept in my office.
What are the expected costs for data storage and backup during the research project? How will these costs be covered?	The requested funding for this project includes the necessary budget to finance a laptop for the candidate and an external hard disk. The storage on the KU Leuven drive is free.

## 5. Data Preservation after the end of the Research Project

Which data will be retained for at least five years (or longer, in agreement with other retention policies that are applicable) after the end of the project? In case some data cannot be preserved, clearly state the reasons for this (e.g. legal or contractual restrictions, storage/budget issues, institutional policies...).	All the data will be retained for at least five years after the end of the project.
