

# THE IMPACT OF DEPOPULATION ON ECOSYSTEM SERVICES IN EUROPE. A PILOT STUDY IN FRANCE, CZECH REPUBLIC AND POLAND

## Research Data Summary

List and describe all datasets or research materials that you plan to generate/collect or reuse during your research project. For each dataset or data type (observational, experimental etc.), provide a short name & description (sufficient for yourself to know what data it is about), indicate whether the data are newly generated/collected or reused, digital or physical, also indicate the type of the data (the kind of content), its technical format (file extension), and an estimate of the upper limit of the volume of the data.

Dataset name / ID	Description	New or reuse	Digital or Physical data	Data Type	File format	Data volume	Physical volume
		Indicate: <b>N</b> (ew data) or <b>E</b> (xisting data)	Indicate: <b>D</b> (igital) or <b>P</b> (hysical)	Indicate: <b>A</b> udiovisual <b>I</b> mages <b>S</b> ound <b>N</b> umerical <b>T</b> extual <b>M</b> odel <b>S</b> oftware <b>O</b> ther (specify)		Indicate: <1GB <100GB <1TB <5TB >5TB NA	
Historical Maps Poland, France and Czech Republic	Digitized topographic maps for a set of selected villages in the study areas	N	D	I	vector	< 100 GB	
Censusdata	(Historical) Population data for set of selected villages	R	D	N	excel	<1 GB	

If you reuse existing data, please specify the source, preferably by using a persistent identifier (e.g. DOI, Handle, URL etc.) per dataset or data type:

data from national statistics agencies of France, Czech Republic and Poland

Are there any ethical issues concerning the creation and/or use of the data (e.g. experiments on humans or animals, dual use)? If so, refer to specific datasets or data types when appropriate and provide the relevant ethical approval number.

- No

Will you process personal data? If so, please refer to specific datasets or data types when appropriate and provide the KU Leuven or UZ Leuven privacy register number (G or S number).

- No

Does your work have potential for commercial valorization (e.g. tech transfer, for example spin-offs, commercial exploitation, ...)? If so, please comment per dataset or data type where appropriate.

- No

Do existing 3rd party agreements restrict exploitation or dissemination of the data you (re)use (e.g. Material or Data transfer agreements, Research collaboration agreements)? If so, please explain in the comment section to what data they relate and what restrictions are in place.

- No

Are there any other legal issues, such as intellectual property rights and ownership, to be managed related to the data you (re)use? If so, please explain in the comment section to what data they relate and which restrictions will be asserted.

- No

## Documentation and Metadata

Clearly describe what approach will be followed to capture the accompanying information necessary to keep data understandable and usable, for yourself and others, now and in the future (e.g. in terms of documentation levels and types required, procedures used, Electronic Lab Notebooks, README.txt files, codebook.tsv etc. where this information is recorded).

GIS-processing of scanned maps, Model-based analysis of census-data

Will a metadata standard be used to make it easier to find and reuse the data ?  
If so, please specify which metadata standard will be used.

If not, please specify which metadata will be created to make the data easier to find and reuse.

- No

Methodological annexes in the papers, accurate metadata-files to identify the databases

## Data Storage & Back-up during the Research Project

Where will the data be stored?

- Large Volume Storage

How will the data be backed up?

- Standard back-up provided by KU Leuven ICTS for my storage solution

Is there currently sufficient storage & backup capacity during the project?

If no or insufficient storage or backup capacities are available, explain how this will be taken care of.

- Yes

**How will you ensure that the data are securely stored and not accessed or modified by unauthorized persons?**

Own storage solution, personal access only

**What are the expected costs for data storage and backup during the research project? How will these costs be covered?**

circa 100 EUR per year paid from project budget

## **Data Preservation after the end of the Research Project**

**Which data will be retained for 10 years (or longer, in agreement with other retention policies that are applicable) after the end of the project?**

**In case some data cannot be preserved, clearly state the reasons for this (e.g. legal or contractual restrictions, storage/budget issues, institutional policies...).**

- All data will be preserved for 10 years according to KU Leuven RDM policy

**Where will these data be archived (stored and curated for the long-term)?**

- Large Volume Storage (longterm for large volumes)

**What are the expected costs for data preservation during the expected retention period? How will these costs be covered?**

circa 100 EUR per year, paid from my free credits

## **Data Sharing and Reuse**

**Will the data (or part of the data) be made available for reuse after/during the project?  
Please explain per dataset or data type which data will be made available.**

- Yes, as restricted data (upon approval, or institutional access only)

For follow-up research upon approval

**If access is restricted, please specify who will be able to access the data and under what conditions.**

My research team members upon approval

**Are there any factors that restrict or prevent the sharing of (some of) the data (e.g. as defined in an agreement with a 3rd party, legal restrictions)?**

**Please explain per dataset or data type where appropriate.**

- No

**Where will the data be made available?**

**If already known, please provide a repository per dataset or data type.**

- Other (specify below)

Shared drives within KU Leuven

**When will the data be made available?**

- Other (specify below)

Upon request after publication of the research results

**Which data usage licenses are you going to provide?**

**If none, please explain why.**

I'm not familiar with these licences

**Do you intend to add a persistent identifier (PID) to your dataset(s), e.g. a DOI or accession number? If already available, please provide it here.**

- No

**What are the expected costs for data sharing? How will these costs be covered?**

No costs are expected

## **Responsibilities**

**Who will manage data documentation and metadata during the research project?**

The promoters

**Who will manage data storage and backup during the research project?**

The promoters

**Who will manage data preservation and sharing?**

The promoters

**Who will update and implement this DMP?**

The promoters
