

## Poetic Justices: The US Supreme Court and the Uses of Literature after 1945

### Research Data Summary

List and describe all datasets or research materials that you plan to generate/collect or reuse during your research project. For each dataset or data type (observational, experimental etc.), provide a short name & description (sufficient for yourself to know what data it is about), indicate whether the data are newly generated/collected or reused, digital or physical, also indicate the type of the data (the kind of content), its technical format (file extension), and an estimate of the upper limit of the volume of the data.

Dataset name / ID	Description	New or reuse	Digital or Physical data	Data Type	File format	Data volume	Physical volume
		<i>Indicate: N(ew data) or E(xisting data)</i>	<i>Indicate: D(igital) or P(hysical)</i>	Indicate: Audiovisual Images Sound Numerical Textual Model SOftware Other (specify)		Indicate: <1GB <100GB <1TB <5TB >5TB NA	
Observational notes	Observations noted down in Word	N	D	T	.docx	<5MB	
Reference documents	Reference documents received and retrieved from various sources	N	D	T and N	.docx, .pdf, .xlsx	<5MB	
Bibliographical references	Bibliographical references to primary and secondary sources, created in Zotero	N	D	T	.docx, .pdf	<5MB	
Recordings	Recorded speeches and interviews of Supreme Court Justices	E	D	S	mp4, wav, .vlc, mp3	<1GB	
Videotapings	Televised speeches and interviews of Supreme Court Justices	E	D	A	mp4, wav, .vlc, mp3	<10GB	
Numerical data	frequency of literary quotations in judicial opinions, patterns of jurisprudence, patterns of dissent vs. concurrence etc.	E & N	D	N	spreadsheets	<200MB	
Notes on secondary material	Notes on and quotations from academic sources	N	D	T	.docx	<10MB	
Notes on primary material	Notes on and quotations from primary sources: judicial opinions, interviews with and speeches by justices, memoirs authored by justices	N	D	T	.docx	<10MB	

If you reuse existing data, please specify the source, preferably by using a persistent identifier (e.g. DOI, Handle, URL etc.) per dataset or data type:

Existing data for recordings and videotapes are yet to be determined. For numerical data on the prominence of certain literary quotations in jurisprudence, see:

- Scott Dodson & Ami Dodson, *Literary Justice*, 18 Green Bag 2d 429 (2015).

Are there any ethical issues concerning the creation and/or use of the data (e.g. experiments on humans or animals, dual use)? If so, refer to specific datasets or data types when appropriate and provide the relevant ethical approval number.

- No

Will you process personal data? If so, please refer to specific datasets or data types when appropriate and provide the KU Leuven or UZ Leuven privacy register number (G or S number).

- No

Does your work have potential for commercial valorization (e.g. tech transfer, for example spin-offs, commercial exploitation, ...)? If so, please comment per dataset or data type where appropriate.

- No

Do existing 3rd party agreements restrict exploitation or dissemination of the data you (re)use (e.g. Material or Data transfer agreements, Research collaboration agreements)? If so, please explain in the comment section to what data they relate and what restrictions are in place.

- No

Are there any other legal issues, such as intellectual property rights and ownership, to be managed related to the data you (re)use? If so, please explain in the comment section to what data they relate and which restrictions will be asserted.

- No

#### Documentation and Metadata

Clearly describe what approach will be followed to capture the accompanying information necessary to keep data understandable and usable, for yourself and others, now and in the future (e.g. in terms of documentation levels and types required, procedures used, Electronic Lab Notebooks, README.txt files, codebook.tsv etc. where this information is recorded).

I will add a README.txt file based on the KU Leuven as project-level documentation, adapted to the general needs of my project and stored both on my overall OneDrive and Google Drive locations. The same applies on my file-level documentation, as I will add a README.txt file to each individual data set. Herein I will explain my general MO (e.g. how to recognize direct quotes from sources versus my personal observations and/or summarizations) and more specific guidelines to understand the rare instances where I will have collected or developed numerical data concerning the Court's quotations and its frequency. I use a uniform naming convention for each file and folder (for now focusing on the Court's primary texts and academic sources, e.g. "notes Court primary sources"; "notes Court academic literature"; "notes constitutionalism general" etc.). By using OneDrive I also use a versioning system that includes documentation on the data manipulation process

Will a metadata standard be used to make it easier to find and reuse the data?

If so, please specify which metadata standard will be used.

If not, please specify which metadata will be created to make the data easier to find and reuse.

- Yes

I have already mentioned the README.txt files accompanying my data with all necessary information in the answer above. Furthermore I am already using uniform naming convention for my files and folders. I will assign DOI's to my datasets and use unique identifiers within each datasets as commonly deployed within my secondary data sources. OneDrive provides a versioning

system that includes documentation on the data manipulation process

## **Data Storage & Back-up during the Research Project**

### **Where will the data be stored?**

- OneDrive (KU Leuven)

All files will be stored on my laptop provided by KU Leuven, connected to both my personal Google Drive (for those files where there are no privacy concerns at stake) and OneDrive for Business.

### **How will the data be backed up?**

- Standard back-up provided by KU Leuven ICTS for my storage solution

### **Is there currently sufficient storage & backup capacity during the project?**

If no or insufficient storage or backup capacities are available, explain how this will be taken care of.

- Yes

### **How will you ensure that the data are securely stored and not accessed or modified by unauthorized persons?**

For now I alone have access to the data, when necessary I will share some with my senior academic host, in light of his own research. Since I'm storing data on my KU Leuven laptop, this is both secured with a numeral code and a personal password. Naturally, my Drive and OneDrive for Business are protected by different passwords.

### **What are the expected costs for data storage and backup during the research project? How will these costs be covered?**

At this stage I don't expect additional costs for data storage and backup, as my OneDrive tools are already provided through KU Leuven.

## **Data Preservation after the end of the Research Project**

### **Which data will be retained for 10 years (or longer, in agreement with other retention policies that are applicable) after the end of the project?**

In case some data cannot be preserved, clearly state the reasons for this (e.g. legal or contractual restrictions, storage/budget issues, institutional policies...).

- All data will be preserved for 10 years according to KU Leuven RDM policy

### **Where will these data be archived (stored and curated for the long-term)?**

- Other (specify below)

I will upload the relevant data to a dedicated academic data repository. However, I have yet to select a fitting data repository for this. For now, I assume the general repository Zenodo might be of use.

**What are the expected costs for data preservation during the expected retention period? How will these costs be covered?**

If I upload the data to a dedicated academic data repository (such as Zenodo), there will usually be no additional costs.

#### Data Sharing and Reuse

**Will the data (or part of the data) be made available for reuse after/during the project?**

**Please explain per dataset or data type which data will be made available.**

- Yes, as open data

There is no temporary restriction other than the prerequisite that the research results will first be published (see below). The main data of interest will be the numerical datasets that my own research produces.

**If access is restricted, please specify who will be able to access the data and under what conditions.**

/

**Are there any factors that restrict or prevent the sharing of (some of) the data (e.g. as defined in an agreement with a 3rd party, legal restrictions)?**

**Please explain per dataset or data type where appropriate.**

- No

**Where will the data be made available?**

**If already known, please provide a repository per dataset or data type.**

- KU Leuven RDR (Research Data Repository)

**When will the data be made available?**

- Upon publication of research results

**Which data usage licenses are you going to provide?**

**If none, please explain why.**

- CC-BY 4.0 (data)

Do you intend to add a persistent identifier (PID) to your dataset(s), e.g. a DOI or accession number? If already available, please provide it here.

- Yes, a PID will be added upon deposit in a data repository

**What are the expected costs for data sharing? How will these costs be covered?**

This is unclear at this point.

#### **Responsibilities**

**Who will manage data documentation and metadata during the research project?**

I will (supported by my senior academic host, Professor Pieter Vermeulen)

**Who will manage data storage and backup during the research project?**

I will (supported by my senior academic host, Professor Pieter Vermeulen)

**Who will manage data preservation and sharing?**

My senior academic host, Professor Pieter Vermeulen

**Who will update and implement this DMP?**

I will (Dr. Remo Verdickt)
