Al for synthetic data

Research Data Summary

List and describe all datasets or research materials that you plan to generate/collect or reuse during your research project. For each dataset or data type (observational, experimental etc.), provide a short name & description (sufficient for yourself to know what data it is about), indicate whether the data are newly generated/collected or reused, digital or physical, also indicate the type of the data (the kind of content), its technical format (file extension), and an estimate of the upper limit of the volume of the data.

Dataset name / ID	Description	New or reuse	Digital or Physical data	Data Type	l _		Physical volume
	EHR from prostate cancer patients	E(xisting data)	D(igital)	Numerical	csv	<100GB	

If you reuse existing data, please specify the source, preferably by using a persistent identifier (e.g. DOI, Handle, URL etc.) per dataset or data type:

Previous collaboration with UZ Leuven (S65338)

Are there any ethical issues concerning the creation and/or use of the data (e.g. experiments on humans or animals, dual use)? If so, refer to specific datasets or data types when appropriate and provide the relevant ethical approval number.

• Yes, human subject data (Provide SMEC or EC approval number below)

S65338

Will you process personal data? If so, please refer to specific datasets or data types when appropriate and provide the KU Leuven or UZ Leuven privacy register number (G or S number).

• Yes (Provide PRET G-number or EC S-number below)

S65338

Does your work have potential for commercial valorization (e.g. tech transfer, for example spin-offs, commercial exploitation, ...)? If so, please comment per dataset or data type where appropriate.

No

Do existing 3rd party agreements restrict exploitation or dissemination of the data you (re)use (e.g. Material or Data transfer agreements, Research collaboration agreements)? If so, please explain in the comment section to what data they relate and what restrictions are in place.

• No
Are there any other legal issues, such as intellectual property rights and ownership, to be managed related to the data you (re)use? If so, please explain in the comment section to what data they relate and which restrictions will be asserted.
• No
Documentation and Metadata
Clearly describe what approach will be followed to capture the accompanying information necessary to keep data understandab and usable, for yourself and others, now and in the future (e.g. in terms of documentation levels and types required, procedures used, Electronic Lab Notebooks, README.txt files, codebook.tsv etc. where this information is recorded).
N/A data from KWS will be used
Will a metadata standard be used to make it easier to find and reuse the data? If so, please specify which metadata standard will be used.
If not, please specify which metadata will be created to make the data easier to find and reuse.
• No
Data Storage & Back-up during the Research Project
Where will the data be stored?
OneDrive (KU Leuven)
How will the data be backed up?
Standard back-up provided by KU Leuven ICTS for my storage solution
Is there currently sufficient storage & backup capacity during the project?
If no or insufficient storage or backup capacities are available, explain how this will be taken care of.
• Yes
How will you ensure that the data are securely stored and not accessed or modified by unauthorized persons?

Only access via ku leuven personal account

What are the expected costs for data storage and backup during the research project? How will these costs be covered?
Question not answered.
Data Preservation after the end of the Research Project
Which data will be retained for 10 years (or longer, in agreement with other retention policies that are applicable) after the end of the project?
In case some data cannot be preserved, clearly state the reasons for this (e.g. legal or contractual restrictions, storage/budget issues, institutional policies).
All data will be preserved for 10 years according to KU Leuven RDM policy
Where will these data be archived (stored and curated for the long-term)?
Large Volume Storage (longterm for large volumes)
What are the expected costs for data preservation during the expected retention period? How will these costs be covered?
Question not answered.
Data Sharing and Reuse
Will the data (or part of the data) be made available for reuse after/during the project? Please explain per dataset or data type which data will be made available.
No (closed access)
If access is restricted, please specify who will be able to access the data and under what conditions.
Only the researcher and the supervisor
Are there any factors that restrict or prevent the sharing of (some of) the data (e.g. as defined in an agreement with a 3rd party, legal restrictions)?
Please explain per dataset or data type where appropriate.

• Yes, privacy aspects

Where will the data be made available?
If already known, please provide a repository per dataset or data type.
Not available
When will the data be made available?
Other (specify below)
Closed access
Which data usage licenses are you going to provide?
If none, please explain why.
Data Transfer Agreement (restricted data)
Do you intend to add a persistent identifier (PID) to your dataset(s), e.g. a DOI or accession number? If already available, please provide it here.
• No
What are the expected costs for data sharing? How will these costs be covered?
What are the expected costs for data sharing: Flow will these costs be covered:
Responsibilities
Who will manage data documentation and metadata during the research project?
Phd researcher
Miles will account the state of
Who will manage data storage and backup during the research project?
Phd researcher
Who will manage data preservation and sharing?
Phd researcher
r nu researchei
Who will update and implement this DMP?

Dr Christos Chatzichristos
