FWO DMP Template

Project supervisors (from application round 2018 onwards) and fellows (from application round 2020 onwards) will, upon being awarded their project or fellowship, be invited to develop their answers to the data management related questions into a DMP. The FWO expects a **completed DMP no later than 6 months after the official start date** of the project or fellowship. The DMP should not be submitted to FWO but to the research co-ordination office of the host institute; FWO may request the DMP in a random check.

At the end of the project, the **final version of the DMP** has to be added to the final report of the project; this should be submitted to FWO by the supervisor-spokesperson through FWO's e-portal. This DMP may of course have been updated since its first version. The DMP is an element in the final evaluation of the project by the relevant expert panel. Both the DMP submitted within the first 6 months after the start date and the final DMP may use this template.

1. General Information	
Name applicant	Anton Jäger
FWO Project Number & Title	The Political Theory of American Populism (12X0122N)
Affiliation	
	☐ Universiteit Gent☐ Universiteit Hasselt☐ Vrije Universiteit Brussel
2. Data description	□ Other:
Will you generate/collect new data and/or make use of existing data?	☐ Generate new data ☑ Reuse existing data

Describe the origin, type and format of the data (per dataset) and its (estimated) volume

If you **reuse** existing data, specify the **source** of these data.

Distinguish data **types** (the kind of content) from data **formats** (the technical format).

The data gathered for the project stem from a total of three sources. The first (i) is a conventional, secondary academic literature in political theory and political history on the topic of populism. These are stored primordially in university libraries. The second (ii) is a large newspaper archive put together by the Library of Congress, which has digitalized dailies and magazines from the 1800s. These are searchable online and allow for saved editions in PDF-format. The third (iii) batch of sources concern scans from American academic collections which have been made in previous years, either by the author themselves or requested appointees. These are all available in a digital storage facility.

3. Ethical and legal issues	
Will you use personal data? If so, shortly describe	□ Yes
the kind of personal data you will use AND add	⊠ No
the reference to your file in your host	If yes:
institution's privacy register.	- Privacy Registry Reference:
In case your host institution does not (yet) have a	
privacy register, a reference is not yet required of	
course; please add the reference once the privacy	
register is in place in your host institution.	
Are there any ethical issues concerning the	
creation and/or use of the data (e.g. experiments	⊠ No
on humans or animals, dual use)? If so, add the	If yes:
reference to the formal approval by the relevant	- Reference to ethical committee approval:
ethical review committee(s).	
Does your work possibly result in research data	□ Yes
with potential for tech transfer and valorisation?	⊠ No
Will IP restrictions be claimed for the data you	If yes, please comment:
created? If so, for what data and which	
restrictions will be asserted?	

Do existing 3 rd party agreements restrict	☐ Yes
dissemination or exploitation of the data you	
(re)use? If so, to what data do they relate and	If yes, please comment:
what restrictions are in place?	

What documentation will be provided to enable understanding and reuse of the data collected/generated in this project? Will a metadata standard be used? If so, describe in detail which standard will be created to make the data easy/easier to find and reuse. The data in question is scanned and retrievable in PDF-format. This means it can easily be transmitted and processed in different portals, whether Adobe, Dropbox, Google Docs, or the KU Leuven's own back up folders. □ Yes □ No If yes, please specify:

5. Data storage & backup during the FWO project	
Where will the data be stored?	The data will be stored digitally, in a personal Dropbox-folder.
How will the data be backed up?	Through Dropbox synchronization – the files are available online on any portal and can be accessed by simply
	logging in to the account in question.
Is there currently sufficient storage & backup	⊠ Yes
capacity during the project? If yes, specify	
concisely. If no or insufficient storage or backup	If no, please specify:
capacities are available, then explain how this	
will be taken care of.	

What are the expected costs for data storage and backup during the project? How will these costs be covered?	
Although FWO has no earmarked budget at its disposal to support correct research data management, FWO allows for part of the allocated project budget to be used to cover the cost incurred.	
Data security: how will you ensure that the data are securely stored and not accessed or modified by unauthorized persons?	

6. Data preservation after the end of the FWO project

FWO expects that data generated during the project are retained for a period of minimally 5 years after the end of the project, in as far as legal and contractual agreements allow.

Which data will be retained for the expected 5
year period after the end of the project? In case
only a selection of the data can/will be
preserved, clearly state the reasons for this
(legal or contractual restrictions, physical
preservation issues,).

The data will be retained, if necessary, after the close of the project.

Where will these data be archived (= stored for the long term)?

Idem – the Dropbox folder.

What are the expected costs for data	Same as previous Dropbox-costs.
preservation during these 5 years? How will the	
costs be covered?	
Although FWO has no earmarked budget at its	
disposal to support correct research data	
management, FWO allows for part of the allocated	
project budget to be used to cover the cost incurred.	

7. Data sharing and reuse	
Are there any factors restricting or preventing	☐ Yes
the sharing of (some of) the data (e.g. as defined	⊠ No
in an agreement with a 3 rd party, legal restrictions)?	If yes, please specify:
Which data will be made available after the end	All the data, if so requested.
of the project?	
Where/how will the data be made available for	☐ In an Open Access repository
reuse?	☐ In a restricted access repository
	□ Upon request by mail
	☐ Other (specify):
When will the data be made available?	Whenever necessary.
Who will be able to access the data and under	Upon personal request via email.
what conditions?	

What are the expected costs for data sharing? How will these costs be covered?	Idem for the Dropbox subscription.
Although FWO has no earmarked budget at its disposal to support correct research data management, FWO allows for part of the allocated project budget to be used to cover the cost incurred.	

8. Responsibilities	
Who will be responsible for the data documentation & metadata?	The postdoctoral researcher.
Who will be responsible for data storage & back up during the project?	The postdoctoral researcher.
Who will be responsible for ensuring data preservation and sharing?	The postdoctoral researcher.
Who bears the end responsibility for updating & implementing this DMP? Default response: The PI bears the overall	The postdoctoral researcher.
responsibility for updating & implementing this DMP
