# A PHILOSOPHICAL INVESTIGATION OF POLITICAL ANXIETY

*A Data Management Plan created using DMPonline.be*

**Creator:** Stefano Micali

**Affiliation:** KU Leuven (KUL)

**Template:** KU Leuven BOF-IOF

**ID:** 206150

**Start date:** 01-10-2023

**End date:** 01-10-2027

**Project abstract:**

The aim of this project is to investigate the actuality and the potential of anxiety as a political affect; and to situate this analysis in contemporary debates regarding the changing role of emotions in the social and political spheres. The project will seek to:

1) articulate the relevance of the phenomenology of anxiety in relation to the contemporary political and sociological questions regarding the place of this affect;

2) through the anthropological-philosophical inquiry, demonstrate the specific features of and anxiety in contemporary society largely determined by risk;

3) offer a phenomenological description of two forms of anxiety widely present in our society: a) anxiety as feeling inadequate (remanence); b) narcissistic anxiety b) anxiety related to new forms of communication technology (digital self-marketing).

**Last modified:** 03-04-2024

# A PHILOSOPHICAL INQUIRY INTO POLITICAL FEAR

---

**Research Data Summary**

**List and describe all datasets or research materials that you plan to generate/collect or reuse during your research project. For each dataset or data type (observational, experimental etc.), provide a short name & description (sufficient for yourself to know what data it is about), indicate whether the data are newly generated/collected or reused, digital or physical, also indicate the type of the data (the kind of content), its technical format (file extension), and an estimate of the upper limit of the volume of the data.**

| Dataset name / ID | Description | New or reuse | Digital or Physical data | Data Type | File format | Data volume | Physical volume |
|---|---|---|---|---|---|---|---|
| | | *Indicate: N(ew data) or E(xisting data)* | Indicate: **D**(igital) or **P**(hysical) | Indicate: **A**udiovisual **I**mages **S**ound **N**umerical **T**extual **M**odel **SO**ftware Other (specify) | | Indicate: <1GB <100GB <1TB <5TB >5TB NA | |
| Literature study | Review of the existing texts relevant for the project | E | D & P | Textual | pdf | <1TB | |
| Papers; Books; Book chapters | Output of the project | N | D & P | Textual | .doc and pdf | <1 GB | |
| Talks | Output of the project | N | D | Textual; Audiovisual; Images | .docx; .doc; pdf; mp4; avi; mp3; aac; wav; jpeg; | <5 TB | |
| | | | | | | | |
| | | | | | | | |
| | | | | | | | |

**If you reuse existing data, please specify the source, preferably by using a persistent identifier (e.g. DOI, Handle, URL etc.) per dataset or data type:**

The Philosopher's Index: https://www.ebsco.com/products/research-databases/philosophers-index

A search will be also conducted using the following interfaces:
Google: https://www.google.com/
Google Scholar: https://scholar.google.com/
Limo: https://kuleuven.limo.libis.be

**Are there any ethical issues concerning the creation and/or use of the data (e.g. experiments on humans or animals, dual use)? If so, refer to specific datasets or data types when appropriate and provide the relevant ethical approval number.**

- No

**Will you process personal data? If so, please refer to specific datasets or data types when appropriate and provide the KU Leuven or UZ Leuven privacy register number (G or S number).**

- No

**Does your work have potential for commercial valorization (e.g. tech transfer, for example spin-offs, commercial exploitation, …)? If so, please comment per**

**dataset or data type where appropriate.**

- No

**Do existing 3rd party agreements restrict exploitation or dissemination of the data you (re)use (e.g. Material or Data transfer agreements, Research collaboration agreements)? If so, please explain in the comment section to what data they relate and what restrictions are in place.**

- No

**Are there any other legal issues, such as intellectual property rights and ownership, to be managed related to the data you (re)use? If so, please explain in the comment section to what data they relate and which restrictions will be asserted.**

- No

## Documentation and Metadata

**Clearly describe what approach will be followed to capture the accompanying information necessary to keep data understandable and usable, for yourself and others, now and in the future (e.g. in terms of documentation levels and types required, procedures used, Electronic Lab Notebooks, README.txt files, codebook.tsv etc. where this information is recorded).**

The datasets from the research project will be stored in clearly labelled folders on KU Leuven's OneDrive. In the label of each file will be indicated: content description, date and initials of the creator (e.g., Protocol_literature search_12 March 2024_MGA).

**Will a metadata standard be used to make it easier to find and reuse the data?**
**If so, please specify which metadata standard will be used.**

**If not, please specify which metadata will be created to make the data easier to find and reuse.**

- Yes

Zotero and Lirias are used to make the data easier to find and reuse. The metadata is embedded in the text files (e.g. .docx, pdf, etc).

## Data Storage & Back-up during the Research Project

**Where will the data be stored?**

- OneDrive (KU Leuven)
- Shared network drive (J-drive)
- Personal network drive (I-drive)

**How will the data be backed up?**

- Standard back-up provided by KU Leuven ICTS

**Is there currently sufficient storage & backup capacity during the project?**

**If no or insufficient storage or backup capacities are available, explain how this will be taken care of.**

- Yes

**How will you ensure that the data are securely stored and not accessed or modified by unauthorized persons?**

OneDrive documents will be shared only among the supervisor and researchers involved in the research project. No unauthorised persons have access to the data. Documents stored on OneDrive will only be accessible to the PhD students, postdoc and the supervisor. If appropriate, the data will be made available to the research unit (Husserl Archives Leuven) staff, with permissions monitored continuously. The OneDrive/SharePoint access security is taken seriously, with the password modified regularly. In case the documents are shared outside of the research project (e.g., of the research team or the research unit), this will be done with restricted access).

**What are the expected costs for data storage and backup during the research project? How will these costs be covered?**

All costs associated with data storage are covered by KU Leuven, as the team uses KU Leuven-provided OneDrive/SharePoint, as well as the internal servers of Husserl Archives.

**Data Preservation after the end of the Research Project**

**Which data will be retained for 10 years (or longer, in agreement with other retention policies that are applicable) after the end of the project?**

**In case some data cannot be preserved, clearly state the reasons for this (e.g. legal or contractual restrictions, storage/budget issues, institutional policies...).**

- All data will be preserved for 10 years according to KU Leuven RDM policy

**Where will these data be archived (stored and curated for the long-term)?**

- KU Leuven RDR

The members of the research group/unit have access to the data with the permission of the supervisor.

**What are the expected costs for data preservation during the expected retention period? How will these costs be covered?**

None

**Data Sharing and Reuse**

**Will the data (or part of the data) be made available for reuse after/during the project?**
**Please explain per dataset or data type which data will be made available.**

- Yes, as restricted data (upon approval, or institutional access only)

The access to the data is restricted to the research team members and is made available to the research center (Husserl Archives) members when needed. Only the officially published generated data (publications) is deposited in Lirias (KU Leuven's institutional repository) with the "public access" license as soon as legally possible, which is verified by the OA Helpdesk. The publications are be made openly available by the Open Access Support Desk, 6 or 12 months after the date of publication, in accordance with the Belgian law.

**If access is restricted, please specify who will be able to access the data and under what conditions.**

During the project, the data will be accessible only to the team members and the PI (Prof. dr. Stefano Micali). After the project, the data that is not made publicly available might be reused by research team/unit members with the supervisor's approval only.

**Are there any factors that restrict or prevent the sharing of (some of) the data (e.g. as defined in an agreement with a 3rd party, legal restrictions)?**

**Please explain per dataset or data type where appropriate.**

- Yes, intellectual property rights

Access to data related to ongoing research activities is only available to the project team members. The published data (e.g. books, articles, book chapters, conference presentations), made publicly available on Lirias, is protected by the intellectual property rights of the author(s) involved in its production, as well as of the Husserl Archives.

**Where will the data be made available?**

**If already known, please provide a repository per dataset or data type.**

- KU Leuven RDR (Research Data Repository)

**When will the data be made available?**

- Upon publication of research results

Upon publication of research results: paper publications, seminars, conference proceedings and workshops.

**Which data usage licenses are you going to provide?**

**If none, please explain why.**

- Other (specify below)

Custom KU Leuven License.

**Do you intend to add a persistent identifier (PID) to your dataset(s), e.g. a DOI or accession number? If already available, please provide it here.**

- No

**What are the expected costs for data sharing? How will these costs be covered?**

As data is shared through *Lirias*, all costs associated with data sharing are covered by KU Leuven. The potential additional costs for data sharing (Open Access, etc.) will be covered with the budget of the project.

**Responsibilities**

**Who will manage data documentation and metadata during the research project?**

The project research team and the PI (Prof. dr. Stefano Micali), with the assistance of KU Leuven IT support.

**Who will manage data storage and backup during the research project?**

The project research team and the PI (Prof. dr. Stefano Micali), with the assistance of KU Leuven IT support.

**Who will manage data preservation and sharing?**

The project research team and the PI (Prof. dr. Stefano Micali), with the assistance of KU Leuven IT support.

**Who will update and implement this DMP?**

The research team with the assistance of KU Leuven IT support.
